# DJI Ace One Driver & Software Installation Guidance Rev1.2

8 You can change the install destination by click **[Change...]**, click **[Next]** to continue.

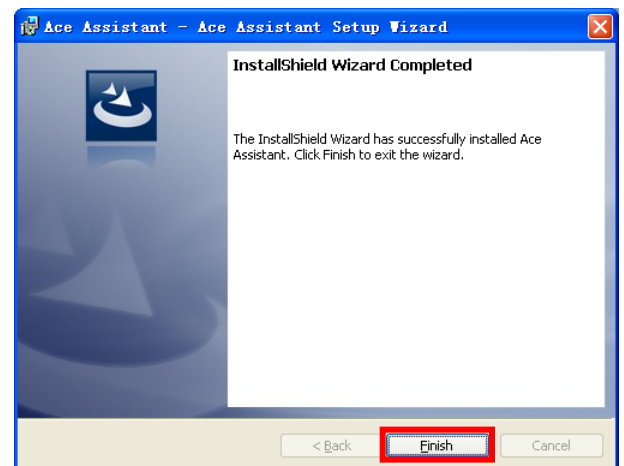

9 Click **[Install]** to begin the installation.

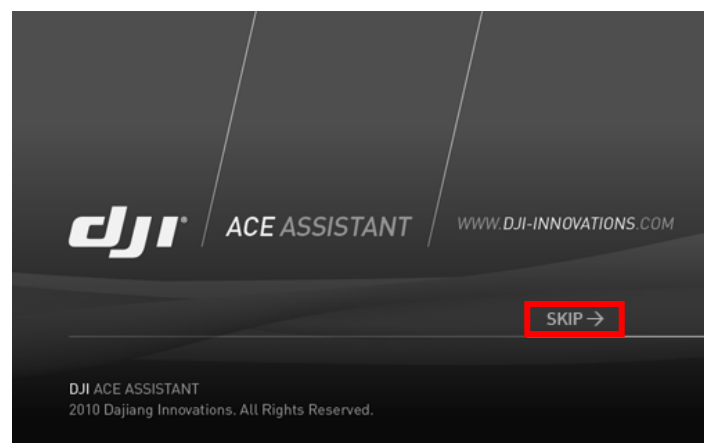

10 Please wait several minutes.

11 Click **[Finish]**, now you have finished the setup of Ace Assistant software.

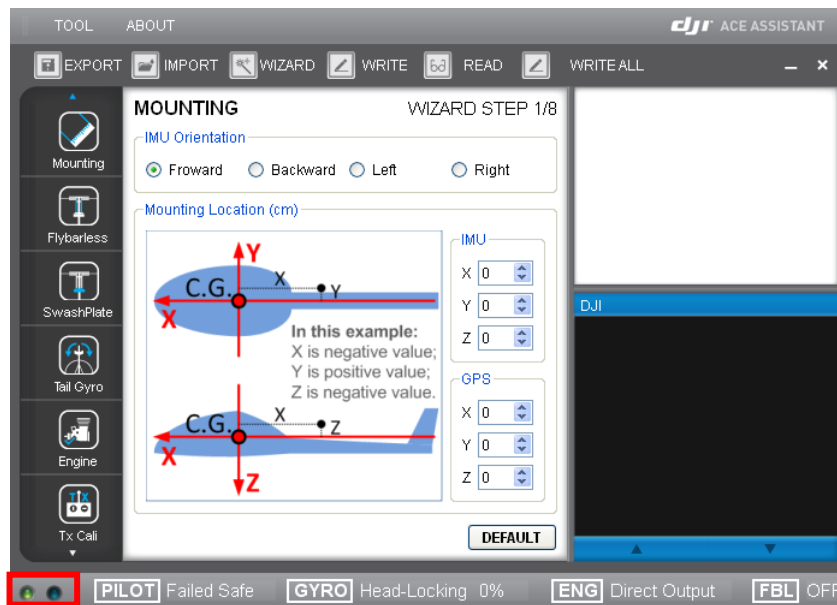

Find Ace Assistant software in your computer

1 Ace Assistant software is part of Ace One autopilot system, please read through the Ace One User Manual before use it.

2 You can find **[Ace Assistant]**, by click **[Start]**→**[All Programs]**→**[DJI Product]**→**[Ace Assistant]**→

3 A splash window will appear as shown below, if your Ace One main controller has not been connected with your computer.
4 If you click **[SKIP→]** button as shown above, or Ace One main controller has been connected with your computer, the Ace Assistant software will appears as shown below.

5 If you have connected the Ace One main controller according to Ace One User Manual, but Ace Assistant software still could not found Ace One main controller (the green light will be in red which means disconnected).

Please click **[Start]→[All Programs]→[DJI Product]→[Ace Assistant]→[Ace One Recovery]**, then the connection problem should be solved. If you still have connection problem, please contact DJI customer support.

6 Please pay attention to our website for Ace One product update, click **[→Click here]** on the splash window of Ace One product CD, you can find the up-to-date contents there.
